1. Introduction

This Business Requirements Document (BRD) defines the business requirements for the E-commerce Analytics Dashboard. It provides a shared understanding among business stakeholders and the project team regarding the business objectives, reporting scope, key performance indicators (KPIs), and expected business outcomes.

2. Business Background

Modern e-commerce businesses generate large volumes of transactional data every day. Business stakeholders require timely and accurate reporting to monitor sales performance, customer purchasing behavior, and product performance. A centralized analytics dashboard enables faster, data-driven decision-making while reducing reliance on manual spreadsheet reporting.

3. Business Problem

Business managers currently extract raw transactional data from multiple database tables and manually prepare reports using spreadsheets. This process is time-consuming, prone to human error, and delays business decisions due to the lack of centralized reporting and real-time visibility.

4. Business Objectives

- Provide a centralized business dashboard.
- Enable data-driven decision-making.
- Improve visibility into sales performance.
- Reduce manual reporting effort.
- Support executive KPI monitoring.
- Provide standardized business reports for faster analysis.

5. Business Scope

- Revenue KPI
- Orders KPI
- Average Order Value KPI
- Top Products Analysis
- Monthly Revenue Trend
- Sales by Category Analysis

6. Out of Scope

- Customer segmentation
- Inventory analytics
- Marketing campaign analytics
- Predictive analytics
- Machine learning models
- Financial forecasting

7. Stakeholders

- CEO
- Sales Manager
- Marketing Manager
- Product Manager
- Operations Manager
- Business Analyst
- Executive Management

8. Assumptions

- Transactional data is available and complete.
- Source data is accurate.
- Users have permission to access dashboard reports.
- Dashboard data is refreshed periodically.

9. Constraints

- Dashboard accuracy depends on source data quality.
- Historical analysis is limited to the available dataset.
- Real-time analytics are not supported.
- Metrics follow predefined business calculation rules.

10. Business Requirements

ID	Business Requirements
BR-001	The business requires a centralized dashboard to monitor sales performance.
BR-002	The dashboard shall provide key sales KPIs for business monitoring.

BR-003	The dashboard shall provide revenue trend analysis over time.
BR-004	The dashboard shall identify top-performing products.
BR-005	The dashboard shall compare sales performance across product categories.
BR-006	The dashboard shall support informed business decision-making through centralized reporting.

11.Success Metrics

Metric	Target
Manual reporting time	Reduce
Report preparation effort	Reduce
Dashboard adoption	Increase among business users
Reporting accuracy	Improve
Decision-making speed	Improve

12.Approval
