1. Introduction

This Dashboard Requirements Document defines the reporting and visualization requirements for the E-commerce Analytics Dashboard. It describes the dashboard components, business metrics, data sources, filtering capabilities, and reporting rules required to support business decision-making.

2. Dashboard Overview

Purpose: Provide business stakeholders with a centralized dashboard for monitoring overall sales performance using predefined KPIs and visual reports.

Dashboard Components:

- Revenue KPI Card
- Orders KPI Card
- Average Order Value KPI Card
- Top Products Bar Chart
- Monthly Revenue Line Chart
- Sales by Category Pie Chart

3. Dashboard Requirements

ID	Requirements	Visualization	Priority
DR-001	Display total Revenue KPI.	KPI Card	Must
DR-002	Display total Orders KPI.	KPI Card	Must
DR-003	Display Average Order Value KPI.	KPI Card	Must
DR-004	Display Top 10 Products by Sales Revenue.	Bar chart	Must
DR-005	Display the Monthly Revenue Trend.	Line chart	Must
DR-006	Display Sales by Category.	Pie chart	Must
DR-007	Dashboard values shall be calculated from the latest available dataset.		Must

4. Dashboard Filters

No interactive dashboard filters are included in this MVP.

5. Data Sources

Table	Description
olist_customers_dataset	Customer details and location info
olist_orders_dataset	Order information

olist_order_items_dataset	Purchased items
olist_order_payments_dataset	Payment value
olist_products_dataset	Product information
product_category_name_translation	Category translation

6. Business Rules

ID	Business Rules
BR-001	Revenue shall be calculated using the total payment_value.
BR-002	Average Order Value shall equal Revenue divided by Orders.
BR-003	Monthly Revenue shall be grouped by purchase month.
BR-004	Top Products shall display only the top 10 products ranked by total sales value.
BR-005	Sales by Category shall aggregate revenue by product category.

7. Assumptions

- Source data is accurate.
- Dashboard users have read access.
- Data refresh is completed before reporting.

8. Constraints

- Dashboard accuracy depends on source data quality.
- Historical analysis is limited to the available dataset.
- Real-time analytics are not supported.
- Dashboard is refreshed manually.

9. Traceability Matrix

Business Requirement	Dashboard Requirement
BR-001	DR-001 ~ DR-007
BR-002	DR-001, DR-002, DR-003
BR-003	DR-005
BR-004	DR-004
BR-005	DR-006
BR-006	DR-001 ~ DR-007
